

ADAM KUKLIŃSKI

ABOUT ME

I am an ambitious enigneer who likes challenges, trying new things and develop my skillset. I do not fear taking responsibility or extra duties. I like to test myself in various situations, which helped in my previous workplaces. I am reliable and trustful person. Already during studies I wanted to try other and new things, which resulted in two different specializations, with two various kind of thesis. Afterwards I was trying work in divergent places i.e. labs, offices, plants. All this to better understand myself, my capabilities and preferences. I worked as a team member during studies and in research facilities, also as team leader in above-mentioned places and during my first full time work. I am a quick learner who is very motivated to do some good work. Because I like to expand my horizons I also do in my free time IT courses.
